SKILL TRACK INDIA

- **Problem Statement ID** – SIH26135
- **Problem Statement Title**- Difficulties in tracking employment outcomes, skill gaps, and the impact of skilling initiatives
- **Theme**- Miscellaneous
- **PS Category**- Software
- **Team ID**- 143
- **Team Name (Registered on portal)**- Hexa Catalyst

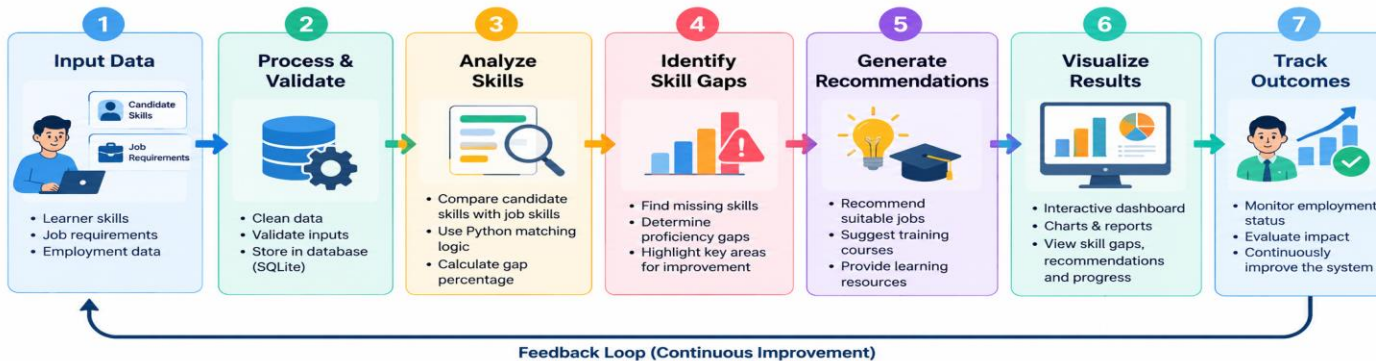

One platform connects training → skills → jobs → employment outcomes.

Technical Approach:

- **User Layer:** Learners • Admin/Jury Dashboard
- **Application Layer:** Flask Web App • Skill-Gap Analysis
- Job Recommendations
- **Data Layer:** Candidate Skills • Job Requirements • Employment Data
- **Analysis Layer:** Python Skill Comparison • Gap Percentage
- **Frontend & Visualization:** HTML • CSS • JavaScript • Chart.js
- **Process Flow:**

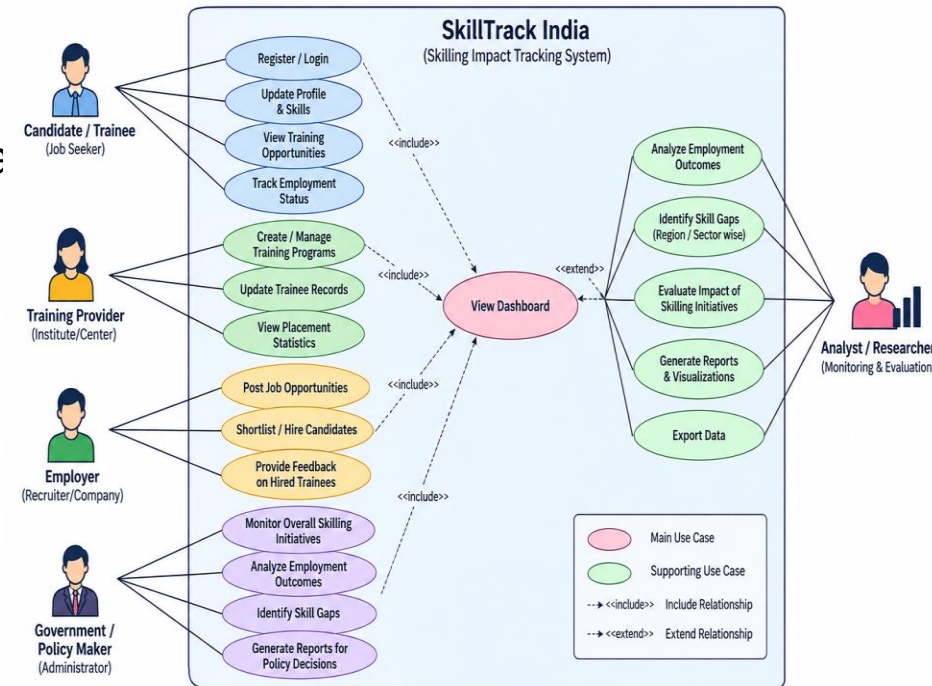

Tech Stack:

Python • Flask • HTML/CSS • JavaScript • Chart.js • SQLite

Use Case Diagram

Difficulties in tracking employment outcomes, skill gaps, and the impact of skilling initiatives (SIH-26135)

Feasible

Low-cost & open-source: Python, Flask, SQL and web technologies.

Easy to implement: Can begin with existing/sample datasets and scale gradually.

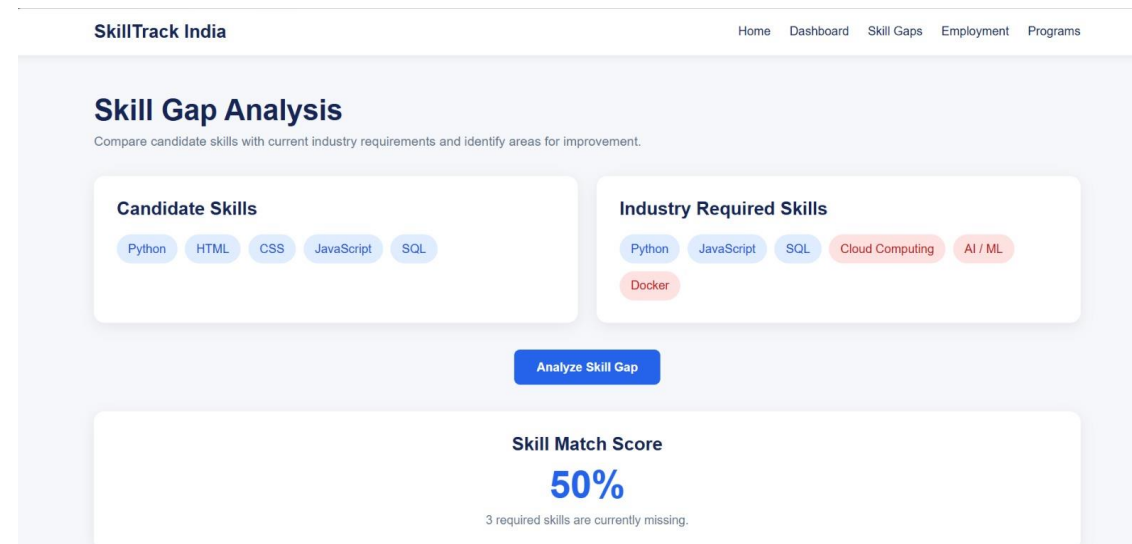

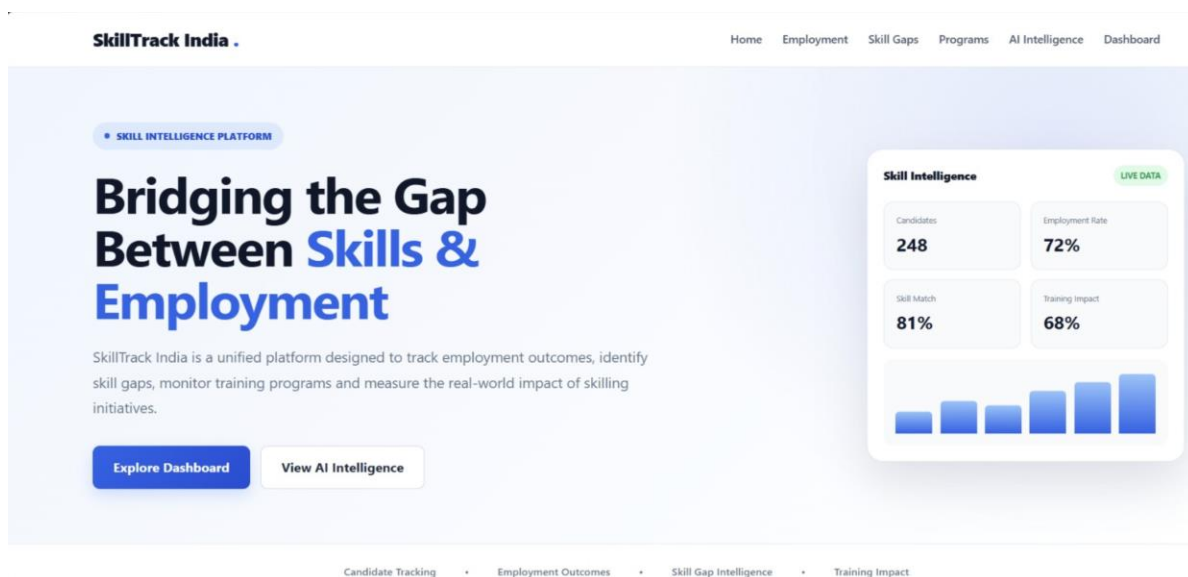

Scalable

Addresses a real skill–employment gap by connecting skills with job requirements.

Useful for multiple stakeholders—learners, training centres, employers and government.

Why our solution stands out

- **Unified platform**
- **End-to-end tracking**
- **Real-time skill-gap & impact analysis**
- **Measures the actual impact of schemes**

Viability test: prove better intervention decisions and better employment quality in a small pilot before scale-up.

IMPACT

Reduces skill–job mismatch
Improves employment outcomes
Enables data-driven skilling decisions

BENEFITS

Job Seekers: Identify gaps and find suitable jobs.
Training Providers: Improve courses based on industry demand.
Government: Track program effectiveness and employment trends.

Beneficiary

How they benefit

Students / Job Seekers

Find relevant training and job opportunities and track their employment journey.

Training Institutes

Track trainees, placements, and identify which skills need improvement.

Employers

Find candidates with the right skills and provide feedback on skill requirements.

Government /
Policymakers

Measure whether skilling schemes are actually leading to employment and make better policies.

Core impact: shift the ecosystem from “how many trained?” to “what outcomes did training create?”

Problem Statement Basis

SIH26135 — Government of Maharashtra: “Difficulties in tracking employment outcomes, skill gaps, and the impact of skilling initiatives.”

Official ecosystem references

MSSDS skill-gap / dashboard services <https://apikaushalya.mahaswayam.gov.in/>

Research direction: map existing data flows, define an interoperable outcome schema, pilot follow-up capture, then validate KPIs.
